NEWS RELEASE

Imaging Biometrics Achieves ISO 13485:2003 Recertification

Milwaukee, WI – Imaging Biometrics, LLC (IB), a biotechnology company specializing in the development of advanced medical image analysis software, announced today that it has been recertified by the International Organization for Standardization (ISO) in an independent audit.

ISO13485:2003 is an internationally recognized quality standard supporting the design and manufacture of medical devices. Companies receiving the certification must demonstrate their ability to provide medical devices and services that consistently fulfill customer and regulatory requirements.

“This recertification underscores our company’s continued commitment to providing high-quality products to our clients,” said IB Chief Operating Officer Timothy Dondlinger. “Adhering to the highest levels of quality gives us an advantage in the marketplace and provides evidence to our clients that our quality management processes are a solid framework for how we conduct business.”

About Imaging Biometrics, LLC

Imaging Biometrics™ develops and provides medical imaging and analytical solutions that enable clinicians to better diagnose and treat diseases with greater confidence. Through close collaboration with top researchers and clinicians, sophisticated advancements are translated into platform-independent software plug-ins which extend the base functionality of workstations, imaging systems, PACS and medical viewers. By design, IB’s advanced visualization software seamlessly integrates into routine clinical workflows.
